

Superior Whole Body Detoxification

Medi-Body Bath

Gentle, Detoxifying, Electrolyte Foot or Body Bath

**Gentle Detoxification
For Superior Health**

Medi-Body Bath

Key Features

- Detoxifying baths with clay, crystalline minerals, peat magma and herbs; key detox agents used for centuries in many cultures
- Maximum cation exchange of bioaccumulated toxins at targeted sites to optimize the rapid return to ideal cellular resonance
- Assists in detoxification of bioaccumulated chemicals and radiation exposure in the ground substance of the body to return to **ideal cellular resonance**
- Promotes healthy circulation and immune systems; helps ease muscle tension; helps rejuvenate cells**
- Initiates the **“thermal effect”**; an increased deep intrinsic cellular cleansing effect
- 100% premier quality ingredients: *No oxidized, heated, toxic minerals or salts; no heated, irradiated or pesticided herbs*

Replacing Electrolytes. The Medi-Body Bath provides extraordinary, body-wide replacement and restoration of key natural-source electrolytes and other minerals, often compromised by medical drugs, a mineral-deficient diet, extreme stress, chemical exposure, lack of sleep, chronic illness and many other factors. In addition it provides key detoxifying agents including halite mineral-crystal complexes, unheated volcanic clay, peat magma (a carbon-matrix humate, rich in humic and fulvic acids) and more

The Medi-Body Bath can be used as a full body bath, for approximately 20 minutes in warm water, which can gently detoxify the entire body via its maximum cation exchange capacity from its multiple, highly ionized natural sea mineral sources.

The Medi-Body Bath can also be used as a foot soak. When the feet are immersed in the Medi-Body Bath solution, a remarkable ion exchange occurs. Nutritive minerals are taken up through the many sensitive acupressure areas of the feet into systemic circulation and simultaneously, there is a gentle exchange of toxic compounds released from many internal pathways throughout the body that are liberated into the water.

The Medi-Body Bath as a foot bath can be used effectively and without concern for side effects, even for the chronically compromised and elderly – all the way to the competition athlete. To feel immediately refreshed after a long day, many people enjoy

the soothing effect of the Medi-Body Bath as a foot bath. If preferred, the Medi-Body Bath may be used as a whole body bath as well with outstanding success.

Breezing Through a Detox. The Medi-Body Bath can be a significant help for those suffering from detox symptoms. In fact, many practitioners often recommend a Medi-Body Bath as a foot bath when a person is experiencing uncomfortable detox symptoms – such as mood swings, mental fogginess, physical pain anywhere in the body as well as many other detox complaints.

The Medi-Body Bath as a foot bath can be a real ace to help rapidly clear these distressing detox symptoms and may allow even an elderly person to regain a better sense of well being and balance in a relatively short time.

After the Medi-Body Pack. The Medi-Body Bath as a foot soak (called the **Medi-Blast**) is also a critical component of the revolutionary Medi-Body Pack system (i.e. the use of ancient “mud pack” therapy” using moor mud, shilajit, volcanic clays and other synergists) to permanently re-establish the healthy bio-energetic flow through previously traumatized areas of the body, such as scar tissue which has been shown by research to have the capacity to send abnormal reflex signals to other parts of the body to disrupt its physiology.

Preserving the Piezo-Electrical Properties

In order to preserve the maximum piezo-electrical power of the special detoxifying crystalline minerals, they have been crushed rather than ground in a grinder. Thus, some of the mineral crystals may not dissolve completely in your bath water. However, the photoluminescent effect generated from the whole mineral crystals is maximally operative in the water. This allows the Medi-Body Bath to deliver far superior health benefits.

Recommended Use

Foot Bath: Adults or children (age 1 and up): place **1 cup of Medi-Body Bath** in a plastic (nonmetallic) container wide enough to place your feet. Add **12 cups warm water**. Swish the contents around in the water with your hand. It is not necessary to dissolve all the crystals. Soak feet for 10 to 20 minutes. Then towel-dry feet. Discard bath water down the drain (do not re-use). For best results, after the bath, spend 10 to 20 minutes or more outside to receive beneficial solar radiation.

Whole Body Bath. Adults or children: add 2 cups of Medi-Body Bath to your bath water. Swish the contents around in the water to dissolve the contents. It is not necessary to dissolve all the crystals. Soak in bath for 10 to 20 minutes. Towel-dry your body. Drain bath water through tub drain. For best results, after the bath, spend 10 to 20 minutes or more outside to receive beneficial solar radiation.
